Portfolio: Sectoral Mix

Portfolio: Size Mix

Superior Risk Adjusted Returns
High Up Capture Ratio of 150+%

- Our performance during up phases of the market has been strong, driven by stock selection
- Mar-20 to Oct-21: 151% Up Capture Ratio
 - Sensex up 101%
 - Our Portfolio up 153%
- Jun-22 to Sep-24: 171% Up Capture Ratio
 - Sensex up 59%
 - Our Portfolio up 101%

Low Down Capture Ratio of ~60%

- Defensive positioning through portfolio construction and cash on books helped our Portfolio fall less than the market during down phases of the market
- Oct-21 to Jun-22: 63% Down Capture Ratio
 - Sensex down 11%
 - Our Portfolio down 7%
- Election day (4th June 2024): 63% Down Capture Ratio
 - Sensex down 6%
 - Our Portfolio down 4%

High Risk Adjusted Returns

- Our rolling 3yr Sharpe Ratio has consistently been 120-150%
- Best in class risk adjusted returns relative to peers. About 30 other PMS' and AIFs have at least 60% large cap composition. Our performance relative to them (as of last qtr):
 - Highest 3yr Treynor Ratio: 24.8
 - 3rd Highest Sharpe Ratio: 123%
- Given fully priced markets it is now even more important to balance risk and reward in portfolio construction

About Us

- Public equity, long only, open ended fund, structured as a Category III AIF
- Fundamental bottom-up research based stock picking
- Manav Saraf and Kabir Kewalramani are the Founders & CIOs
 - Started their careers together 25 years ago at Indocap Chase Capital, the Indian private equity arm of JPMorgan
 - Have been senior professional investors for leading global private equity firms including Lone Star Funds, Citadel and Berggruen
- Founders and their families have invested over INR 80 crores into the Fund -> strong alignment of interest
- Started in Jan-20. Since Nov-21 structured as an AIF. Data includes assets managed prior to getting AIF approval

NAV Reporting: monthly

Redemption: 31st Jan, 31st Apr, 31st Jul, 31st Oct. 1 month notice

Exit Load: 2% in year 1, 1% in year 2

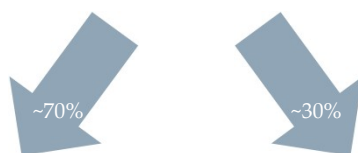

Investment Objective & Strategy

Investment Objective:

To generate 20% returns annually over any 3-5 year rolling period, while limiting the risk we take

Investment Strategy:

To buy "good" companies if they are cheap, and ONLY if they are cheap. If they are not cheap, we stay on the side-lines in cash for periods

Investment Style

Invest in companies that are identified as undervalued. This encompasses many styles which we have used so far:

- GARP: Growth at Reasonable Price: limited opportunities
- Cyclical: Buying a cyclical sector (e.g. commodities) at its lows
- Contrarian: We can take a contrarian view on a company / sector
- Cheapness relative to its own history
- Cheapness relative to sector

Portfolio Construction (illustrative)

- Only invest in Indian public equity, or hold cash
- Number of stocks in portfolio: 15 - 30
- Single stock limits: 10% (SEBI restriction), additionally never higher than 5% in a small cap (our internal risk framework)
- Sector limits: no limits, we can take a strong bias towards a sector
- Market cap limits: no limits, however using our internal risk framework we typically have ~30% invested in small caps. Average small cap ownership so far is 23% of the portfolio. Average market cap of small caps ~\$1 bn
