Investment Objective & Strategy

Investment Objective:
To generate 20% returns annually over any 3-5 year rolling period, while limiting the risk we take

Investment Strategy:
To buy "good" companies if they are cheap, and ONLY if they are cheap. If they are not cheap, we stay on the side-lines in cash for periods

Investment Style

Invest in companies that are identified as undervalued. This encompasses many styles which we have used so far:

- GARP: Growth at Reasonable Price: limited opportunities
- Cyclicals: Buying a cyclical sector (e.g. commodities) at its lows
- Contrarian: We can take a contrarian view on a company / sector
- Cheapness relative to its own history
- Cheapness relative to sector

Portfolio Construction (illustrative)

- Only invest in Indian public equity, or hold cash
- Number of stocks in portfolio: 15 - 30
- Single stock limits: 10% (SEBI restriction), additionally never higher than 5% in a small cap (our internal risk framework)
- Sector limits: no limits, we can take a strong bias towards a sector
- Market cap limits: no limits, however using our internal risk framework we typically have ~30% invested in small caps. Average small cap ownership so far is 24% of the portfolio. Average market cap of small caps ~$1 bn
